PROFESSIONAL

THE AiOX PROFESSIONAL

Welcome to the world of extraordinary mat board cutting. For the first time in the evolution of computerized cutting machines, the Professional version of the GUNNAR AiOX product family offers the most efficient capabilities for our industry. Swiss quality and precision for every picture framer. That's our promise.

MAIN APPLICATIONS

Frame shops and framing businesses needing large scale production with precision, speed and efficiency.

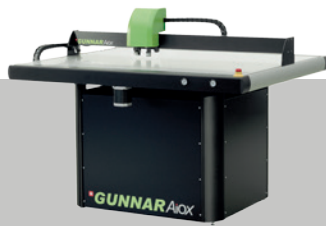

PRODUCT CHARACTERISTICS

- Two separate, fully synchronized cutting heads for independent, very precise 45° and 90° cuts
- Automatic blade depth adjustment for V-grooves and double mats
- No tool changes, just continuous mat board production, including inside and outside cuts, as well as V-grooves and decorative cuts in one uninterrupted process
- Cutting edge-to-edge maximizes mat board usage with unique button finger clamps, and it can be equipped with the optional vacuum bed
- Tool-less blade change in seconds
- Perfect cut results for all boards guaranteed up to 3.5 mm thickness and up to 5.0 mm thickness for foam boards with the 90° cutting head
- Simple and intuitive operation with our comprehensive and in-house developed GMC operating software
- Revolutionary modular, compact and modern system design and completely flat table
