

SENATOR TOP COAT GLUER

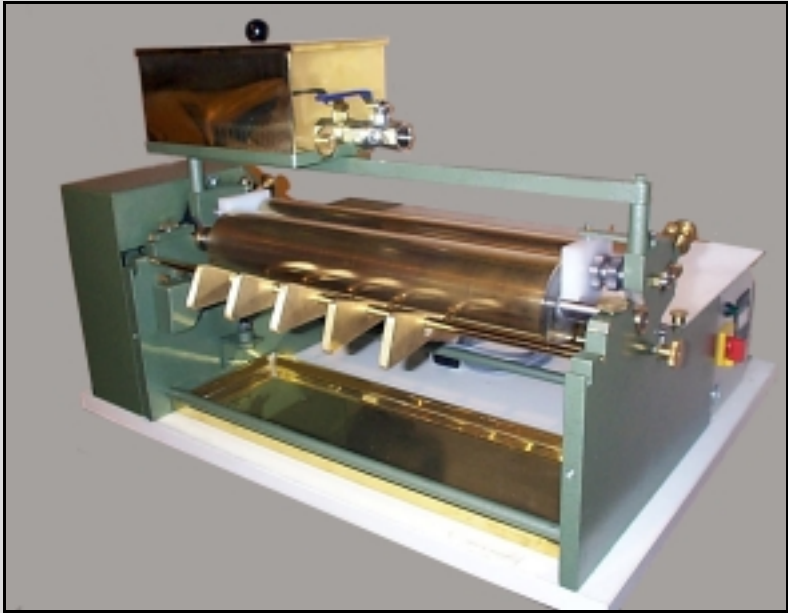

Table Top Version Pictured Above

The new **SENATOR TOP COATER** applies water based dextrin or resin adhesive onto nearly any item from paper to board stock up to 1/2" (13 mm) thick! The convenient glue tank over the glue rollers uses an easy to open valve to dispense adhesive onto the roller assembly.

Glue control is achieved by adjusting two knobs. A pressure bar attachment helps propel the item through the gluer, assuring an even film of glue or adhesive onto paper materials or items up to 5/8" thick.

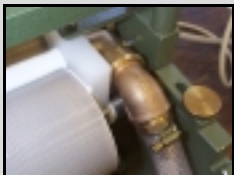

- Easy, safe and simple operation
 1. Excellent glue film control
 2. Inverter gives variable speed control
- Available in table-top version with its own stand.
- 20" (50 cm), 26" (66 cm), 32" (80 cm) 36" (90 cm) & 42" (105 cm) roller widths
- Available for use with 120 or 220 volts, single phase
- Easy to operate, clean and maintain
- Optional Recirculating Adhesive Pump System for optimal adhesive performance

Senator with Stand

Rear View showing Inverter

- Optional Recirculating Pump System
- 1/2" air operated Double Diaphragm Pump brings adhesive to glue rollers.
 - Adhesive drains from glue rollers back to glue container.
